
Applied Hydro And Aeromechanics Prandtl Based Lectures

an introduction to laplace's equation in physics - $f = -g \rho r^2$ g is the gravitational constant, r is the distance between the particles and \hat{r} is a unit vector directed from m to m mass establishes a force field, which we call h . we write the force field as $h = -g \rho \hat{r} r^2$ when there is a distribution of mass particles m_i , the force field is the vector sum of the fields of each particle.
